27 January 1956

MEMORANDUM FOR: Project Contracting Officer

**SUBJECT : Coordination Between AQUATONE and
Air Force Project Group**

On 26 January 1956 we discussed your memorandum to me on the above subject of the same date. I believe outstanding questions were settled for the present in the course of that discussion. I repeat that every reasonable effort should be made, in my opinion, to keep the Project Group away from SAC and away from our suppliers for the present. I learned from Kelly that they spent considerable time with [redacted] on the occasion of their visit to Watertown and have already come up with a considerable list of proposed modifications, including an ejection seat. I am unclear as to the present status of their modification proposals, and I hope they can be talked out of this kind of thing.

(s) Richard M. Bissell, Jr.
RICHARD M. BISSELL, JR.
Project Director

cc: Deputy Proj Director
